SCAN2i

A fully automated audio-visual diagnostic platform powered by AI

Workplace transformation is not new. But the question is, have you caught on yet? Imagine being able to know which specific audio visual device is faulty, or exactly when and which equipment is due for maintenance. **All with one single dashboard.**

> ## Holistic 360° Managed Service dramatically reduces system downtime with instant diagnostics, predictive maintenance and resolution support

On-demand system health checks

Predictive maintenance

Instant diagnostic analysis

Data and usage trend analytics

Full visibility of your audio visual devices

Seamless integration across all devices

How does SCAN2i work?

Monitor, Diagnose and Maintain
SCAN2i's dashboard serves as a single-pane management portal for real-time monitoring, diagnosis and predictive maintenance of an organisation's entire AV infrastructure.

360°
Managed Service
Top 3 things you need to know about SCAN2i

Remote and On-site Support
Highly experienced specialists and technicians with decades of experience so that you can get peace of mind.

Report and Analyse
Get reports, trend usage and insightful analysis to help your organisation know which spaces are performing better than others.

Why do you need SCAN2i?

✓ **One single device-agnostic dashboard**
Improve user experience while reducing resources spent on management and support of multi-brand systems. All SCAN2i functions are available from a single browser-based user interface.

✓ **Reduced inefficiencies during important events**
SCAN2i eliminates frustration caused by technical problems and issues that occur during meetings, video conferences and presentations. We provide a 360° Managed Service that helps you identify and resolve AV issues before your meetings even start.

✓ **Save time and costs with instant diagnostics**
With SCAN2i, you can run system checks in multiple locations remotely and simultaneously. The instant diagnostic analysis identifies errors and pinpoints which equipment is malfunctioning and suggests how to resolve it. Your remote or on-site support teams will be able to resolve incidents easier and quicker.

✓ **Prevent device failure with Predictive Maintenance**
Get early warning notification of equipment issues days, weeks or even months before failure.

✓ **Data visualization and analytics**
Get better insights and increase your ability to act on data. All data regarding device usage, failure rates, power consumption, and user trends are analyzed and transformed into visually appealing graphical presentations.

> Move from reactive repairs to intelligent monitoring and predictive maintenance today!

About AITS

Armed with the sole aim of providing revolutionary technology to spaces, AITS prides itself on pushing workspaces and even leisure spaces to a frontier that almost no other company has done before. We want to ease the hassle of both daily recreational and working life. With decades of experience under our belt, AITS was formed to bring convenience and simplicity through the use of AI.
