

# Social Distancing Management

COVID-19 Support

---

Safer  
Faster  
Smarter

SafeRange is a wearable solution for safety management that measures the distance to other SafeRange devices to ensure sufficient space between users.

The device emits a sound and/or a vibration to notify that more distance is required.

## Product Features

---

### Social Distancing Alerts

Vibration and / or sound alerts and led lights will be triggered when 2 or more SafeRange devices are within preconfigured Social Distancing length.

### Contact Tracing

Trace who you have been in contact with for the past 2 weeks.

### Geofencing

Geofencing technology detects the locations of SafeRange users and alerts can be triggered when users cross a designated perimeter.

### Surveillance & Overcrowding Alarm

Tracking users that intermingle with users from different zones.

## Heart Rate Monitor & Step Counting

Measures your heart rate and steps taken.

## Long battery life

Rechargeable 800mAH battery. Long battery life of up to 60 days.

## Real-time Visibility and Insights

Data captured will be displayed on a live web based dashboard, providing valuable insights and reports.

## High Security and Privacy

AITs uses end-to-end encryption and stores it only for the purpose of facial authentication. Fully compliant with privacy laws.

## Extensive Reports

Customized report generation for internal audits and documentation.

## Cloud Solution / On-premise Solution

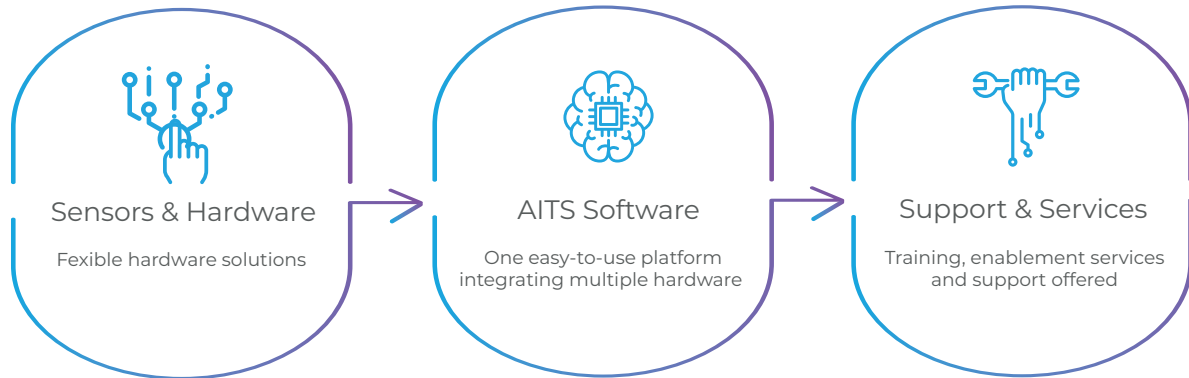

Our system creates and stores profiles in the device (edge computing) and backs them up to your cloud (eliminating the hassle of profile management) / to your local server (giving you full control of all device and profile data).

## Customizations

AITs is a one-stop complete Artificial Intelligence solution integrator. We can provide customized solutions tailored to your business needs.
